SAFETY DATA SHEET (SDS)

formerly MATERIAL SAFETY DATA SHEET (MSDS)

According to the *Hazard Communication Standard* of the *Occupational Safety and Health Administration* (OSHA), requirement 29CFR1910.1200(b)(6)(v) and the Canadian *Workplace Hazardous Materials Information System* (WHMIS) : SDS (*Safety Data Sheets*) are required for all hazardous chemicals. However, these standards specify that the regulation does not apply to “articles”.

By definition of the standard, “articles” means:

A manufactured item other than a fluid or particle:

- (i) which is formed to a specific shape or design during manufacturing;
- (ii) which has end use function(s) dependent in a whole or in part upon its shape or design during end use;
- (iii) which under normal conditions of use does not release more than very small quantities, e.g., minute or trace amounts of a hazardous chemical and does not pose a physical hazard or health risk to employees.

Therefore all finished products manufactured by Premier Industrial Hose Manufacturing Ltd are exempt from the SDS requirements.

The SDS on raw material, however, is kept on file for when our customers might need it.
